Before you play this know which

La-a-and Ho-o-o! It's Tiny Toon Adventures™ - Buster's Hidden Treasure™ for Sega™ Genesis™! As Buster Bunny, you've landed in a 33 stage treasure hunt adventure. Check out the animated terrain and "toon" your big blue ears into the groovular sound effects. Bounce through cartoon turf such as the Underground Sea and a Waterfall so wacky, you won't know which way is up.

You've got to rescue your pals and find the treasure before spoiled Montana Max spoils your plans. But you'll practically have to move mountains if you're going to make it through the mountainous Radar Range.

You're drooling for that 14 carrot gold, but so is every other toonster in town! Dr. Gene Splicer has even brainwashed (we use the term loosely) Emyra and Dizzy Devil to do his dirty work. Here in the Excavation Factory you'll really have to crank out the carrot juice to survive.

The art style of this game is based on a special commissioning style. The actual style used is a combination of the style of the original game and the style of the original game.

The Shipwreck will have you sunk because it's swarming with zany challenges. In a pinch, you can always spring a triple jump or slide down a rope with your ears.

cartoon, you better way to Gogo.

Welcome to the Fungusamungus Forest, where creepy trolls and owls are just dying to meet you. But hang on to your carrots, Gogo Dodo will show you where to go throughout this adventure.

The Plains! The Plains! This fantasy island is fraught with freaky flatlands. Before they flatten you, watch out for unidentified falling objects, electric zappers, moving walls, levers and misplaced rakes.

Happy Spelunking! No, it's not a Swedish holiday, save your greeting cards. You're going to be exploring the Deepdark Caverns. Some caves flow with molten lava. Talk about a hot foot!

NINTENDO OR SEGA... WHO IS NUMBER ONE?

We're back from CES and like always, it was a great show. There were tons of new games and a lot of new technology. As usual, it's all here in this issue along with the first info, specs and pictures.

But this year, there is something new. The 16-Bit wars that started a year ago September, when Nintendo brought out their Super NES, may just have a new leader. It all depends on whose numbers you believe. Nintendo claims they sold 6.6 million Super NES systems last year. They say that they have 69% of the 16-Bit market with a total of 8.7 million systems in our homes. Sega maintains they sold 4.5 million system in 1992 and have an installed base of 7.5 million systems. Each company says that they are in first place. Who do you believe?

Nintendo did have a great year. They, and their licensees, were able to bring out a constant stream of great games to convince players that the Super NES is the system to buy. Sega, on the other hand, took a pass on the first 8 months and concentrated on selling their games and systems during the Christmas season. Was this wise? Probably not, as Nintendo, by working hard all year long, was able to catch up with, and probably pass, Sega.

Has Sega learned anything from this? Judging from what we saw at the Winter CES, they haven't. Their Menacer light gun won't have a new game for at least another 6 months. Their spectacular Activator allows players to lift their legs and arms to play tunes. Their hot CD system needs new games. From their production list, the CES games either: weren't there (Sonic, Dolphin, Sherlock Holmes 2), playable (Joe Montana, After Burner 3, Indiana Jones, Final Fight). Not too impressive considering Sega was bragging about their great billion dollar multi-media CD studio they built last year.

What does Sega say about this? The same thing they said last year: "Wait until Summer CES." But, will the dealers and players wait? The NES is dead. This will be the year that players move up to a 16-Bit system. Nintendo projects that their Super NES system sales this year could approach the all-time yearly single-platform record! That is 3 million new Super NES systems. About seventy-five percent of these will be sold during the Christmas season. That leaves two million systems to be sold from January through September. These two million players will look at the new games on the shelves and see a lot of exciting titles for the Super NES. Will they be as impressed with the new Genesis titles? Perhaps not, as they would have to wait until fall when the Summer CES games get to the stores. Which system will they then buy?

History seems to be repeating itself. A few years ago Sega had a great 8-Bit system (Master System). It was clearly superior to the NES. Nintendo persevered though, and with a lot of hard work, they made the NES a household item. Nintendo is now back with their 16-Bit system. In a little bit over a year they have gone from nothing to at least tied for first place. And knowing this, Sega, can you really afford to make the game players "wait until Summer CES"?

LETTERS TO THE EDITOR

Your letter is in your issue! You now have a 300% or a 500% opportunity to get the straight story on anything in the video game industry. The only catch is that you have to be creative. We're tired of hearing about the SF2 Boss Code only. Talk about something controversial. You don't have to rag on the other mag; the 1 must number do all the talking. Get the idea? So put the game on the line and don't worry. Sure, there's a 5% chance you'll get published, but please, please really tell us how often. If you REALLY want to know as you should know something as the heart of your letter. There need to be markers. Letters to the Editor, c/o Sega Publishing Group, 1022 Highland Avenue, Suite 002, Lombard, Illinois 60148. And if you want a personal answer to your question, tell your letter editor in your issue in the letter.

BLAST AWAY...

Recently I've heard Sega claim that the Genesis has a feature called Blast Processing. Sega also boasts that the Super NES doesn't have this technology. Could you explain what Blast Processing exactly is?

Todd Noel
Boardman, OH

Sonic gets ready to kick the Genesis into its 'blast processing' mode.

(Ed. Sega is quite vague when it comes to giving away the exact meaning or procedure of their new technology. Such is the case about their "exclusive blast processing mode". What they would say when questioned, is that BP is "the total power dedication of the Genesis system to giving a character on screen a very quick blast of speed. This guarantees the fastest power punch ever delivered on a 16-bit system." Sega states that BP is like kicking the system into turbo-charge. The first example of BP occurs in Sonic the Hedgehog 2 when Sonic or Tails get into their spin-dash maneuver and bolt across the screen "in the blink of an eye". Revolutionary? You tell us!)

STREET FIGHTER 2...TOO EASY!

I was wondering if there was anything that would make Street Fighter 2 any harder. I know this sounds stupid, but I have beaten M. Bison (on level 7) with every world warrior. All you have to do is stay in either corner and when he jumps at you kick him.

Chris Moore
Louisville, KY

I tried the Game Genie Boss code that you published in your last issue and it does work! Unfortunately it glitches out after a while. Have you been able to get a better code?

Jason Bench
Seattle, WA

(Ed. A harder SF2? First, why don't you try a little technique. I would hardly consider standing in a corner and kicking, a great way to play this game. But, if you want it harder, try the Game Genie code BE6D-DD64 in SF2 player 2 (the computer) will be invulnerable.)

For another Boss code, check out our tricks section in this issue!

Want a real challenge? Play an invulnerable opponent (except for his shadow) in SF2!

MERRY CHRISTMAS...

Thanks for the Christmas card that came with last issue. Never have I ever got anything like this from any of the many publications that I subscribe to. That was very thoughtful of you as all I get from the other game mags are cards wanting me to resubscribe. Next year I think you guys should give money or games with your Christmas cards. At least to the subscribers.

Janison Cranmer
Binghamton, NY

One small reason why you should subscribe to EGM. More surprises are coming!

(Ed. Didn't you get the check we enclosed with the card? After all of the envelopes were sealed, I had this strange feeling that we forgot to include something. Oh well, perhaps next year.)

Seriously, the card is just a small token of our appreciation for your dedication to making EGM the best selling mag in the industry! We have a lot of cool things lined up for 1993, and the Christmas card was just the first of many "subscribers only" no-cost specials that we plan on sending out this year.)

HE'S QUICK, HE'S CURIOUS, HE'S QUBE-ACIOUS!

TOO HOT TO HANDLE!

We know that our readers have a burning desire to know everything possible about video games but sometimes they go too far. It seems that the tip which Mr. Jason Zenife from Grafton Ontario sent in was so hot that it set the letter on fire!

The Canadian post office had this to say about what happened to the letter.

"Dear Customer,

The enclosed item of mail was vandalized by a person or persons unknown.

Although we have no control over this type of vandalism, we wish to express our sincere regrets for the inconvenience caused you by this unfortunate incident. It is hoped the delay resulting from this incident is not serious.

Yours sincerely,
Kelly Travers
Representative"

Readers are sending in tricks that are so hot that they set the mail on fire!

(Ed: Well Jason, were we inconvenienced? Was your trick so hot that it started the mail on fire? Could it have been the SF2 Boss Code! We'll never know, thanks to the trusty post office!)

STREET FIGHTER 2 FOR NES!

All I seem to care about these days is Street Fighter 2. I am very interested in obtaining the NES version of this hot cart. None of the stores that I have contacted could find the game but it must exist, as you ran pictures of it a few issues ago. I think it came from Hong Kong or some other Asian country as I know it wasn't from Japan. Is this an illegal cart and that is why nobody can get their hands on it? Or, is this something I must order straight from Hong Kong?

Stan Baddies
Manhattan Beach, CA

LETTER OF THE MONTH!

"The 'L' (Joe L. Aguilera) is my middle name for 'Loki'. For telling you this so you can write 'JOEL', I want to write this middle name initial because in this area where I live, I already know 2 persons called Joe Aguilera, and that 'L' would really make a difference, don't you think so? (I just don't want to see those other dudes saying that they sent in this tip, it wouldn't be fair if I could really appreciate it if you write down LOUIS instead of the 'L', so it would read Joe Louis Aguilera... Thanks for reading my letter. How do you like the good work TOM? Could you please answer my letter telling me if I did or did not get the free video game? I know you will. THANK YOU!! Here's my address again Joe L. Aguilera, Dallas TX."

Well JOEL, there is good news and bad news. The good news, JOEL, is you are one of the very few players in the country who will get an answer from us about the questions in their letter. The bad news, JOEL, is the fact that the Midnight Resistance trick you sent in really sucked big time. I mean, JOEL, the game is older than most of the guys who are writing for us! And, hey JOEL, do you think you told us enough times how to spell your name? Do you think we won't do it right, JOEL? The other bad news, JOEL, is that you didn't win the free game. The good news, JOEL, is that you did win a T-Shirt! Welcome to our Psycho club JOEL!

WIN AN OFFICIAL EGM T-SHIRT!

If you send us a letter you never really know where it may appear. It could be as a letter to the editor, in the artwork section, as a game trick, or possibly even like JOEL's letter - on this page! If you see your masterpiece here, we'll reward you with a limited edition EGM T-Shirt as our gift!

An 8-Bit NES version of Street Fighter 2 will be coming out later this year!

(Ed: The Street Fighter game that we ran pictures of was an unlicensed version of the game that was produced in southern Asia. You are right, as such copies of the game are illegal and that is why nobody can get their hands on it. Don't give up hope, though. In talking with the people at Capcom during the Winter CES, we have found out that there will be a legal NES version of Street

Fighter 2 coming out in the U.S. later this year! Capcom has licensed the rights to do the game to a yet unannounced Nintendo licensee. Exactly how much the game has to be cut back to fit into a NES cart that would have at most, 4 megabits of memory, how the controls will work with only two buttons on the standard NES controller; and whether all of the world warriors will be in the NES version are several questions that are yet unanswered.

Since you are a die-in-the-wool NES player, you might also be interested in Capcom's newest 8-Bit game. It is called Mighty Final Fight and essentially it is a scaled down version of their classic 16-Bit title. This cute cart will be coming out later this year and it is worth waiting for. For an exclusive preview of this soft, turn to page 140.)

BAD EDITORIAL...

In Issue 42 of Insert Coin, the Editor Ed Semrad, was talking about Nintendo "Sega Bashing" Sega about CD-ROM systems. Well, in almost every Sega commercial, Sega puts down Nintendo about their system. In Nintendo's commercials you never see them talking about Sega. All I'm saying is that Ed Semrad should look at Sega before saying what he said about Nintendo.

Keith Martinez
Plainville, TX

GOOD EDITORIAL...

I was surprised when I saw Ed Semrad's editorial under the Insert Coin by-line. While I had been stewing over the obviously continued nature of Nintendo's CD system press release, I also realized that many younger gamers would be naive enough to take these conveniently timed memos at face value. It must have taken a great deal of courage for you to take a major gaming power and big money advertiser to task the way you did. I don't think any other gaming publication would have the guts to tell the big 'N' to put up or shut up. For those of you out there who believe that Nintendo's vaporware announcements were anything other than an attempt to steal Sega's thunder, you can send me a check for \$200.00 and I will mail you my new 64-Bit, Pro-Logic sound, fully holographic, Smell-O-Vision CD system.

(Ed. We have received a fair number of letters about Ed's February editorial. The responses are evenly divided as to whether the editorial was good or bad, and when the reader mentioned which system he owned, the Super NES owners didn't like the editorial and the Sega owners thought it was well written.)

Some readers went so far as to say that we were on Sega's payroll, citing our 68 page Sega Force insert that we did in November. They somehow forgot about the 60 page Super NES directory that we ran last month

Other readers gave us detailed analyses of everything we did over the past few months and concluded that we were nothing more than an Illinois branch of Sega of America. How quickly these players forgot that we gave the Game System of the Year to the Super NES, and also awarded the Best Game of the Year to Street Fighter 2, a Super NES game.

What do you think? Is EGM pro Sega, or pro Nintendo, or just a magazine that has an opinion and is not afraid of speaking our mind? Is there a difference between a TV commercial that attacks the opposition, and a series of official press releases that constantly change a company's position. First, read this month's editorial and then send us your comments.)

MORE SEGA RPGs

I've got a couple of questions for you. I really love my Genesis, but where are the RPGs? I bought the system a few years ago because of games like Phantasy Star 2 and 3 and Vermilion. Since then there has been nothing. Zilch! Back in June you talked about a game called Shining Force. Is this related to Shining in the Darkness? Will it ever come out over here?

Toby Zyskowski
St. Paul, MN

Sega will be bringing out the hot RPG Shining Force later this Spring!

(Ed. We asked those very same questions to the head honchos at Sega when we interviewed them at the Winter CES. Good news! Not only will Sega be bringing out a U.S. version of Shining Force this Spring, but they will also give us the megahot Land Stalker this Fall. And next Spring we'll have Phantasy Star 4!)

SUPER NES CD-ROM...WHEN?

When will Nintendo be bringing out their CD-ROM. What's the deal with them? I am really getting P.O'd at them for always changing their release dates on every good thing they make.

Shawn Shackelford
Tucumseh, OK

I am an owner of both a Super Nintendo and a Genesis system. I am very interested in CD-ROM technology. My question is if I should get a Genesis CD-ROM, or wait to see what the people at Nintendo have to offer? Genesis has the technology now. Nintendo, on the other hand, seems to be making promises they can't keep. A 32-bit system with Philips CD-i compatibility for \$200 by the Winter of 1993-1994? Come on Nintendo! How in the world are you going to do that?

Chad Clark
Shelbyville, IN

Nintendo is starting to think twice about the price and release date of their CD-ROM.

(Ed. Nintendo decided to play down CD-ROM video gaming at the Winter CES. In the past, the big 'N' would match and then outdo anything that Sega had to say about CD-ROM but this time Peter Main, vice president of marketing, said "What these numbers indicate [13.3 million Super NES, NES and GB game systems and 78 million cartridges] is resounding support for the fact that the video game business is cartridge based, and will continue to be for the foreseeable future. Our 8-bit NES, which has been on the market for seven years, still represented more than 20 times the market of CD-ROM based video games in 1992." It sure sounds like Nintendo isn't too bullish about the immediate future of CD-ROM!)

GORE OR NO GAME...

I was wondering if you know if Williams was considering producing a home version of Mortal Kombat. If a version was to come out I probably would like the Sega CD because it would have the best graphics. What systems would the game come out for? If it would be on a Genesis or Sega CD how would they handle the 5 buttons needed to play the game?

When I went to Disney World, I played MK. What shocked me was the fact that the bloody effects were deleted and I couldn't perform the fatalities. Is that type of gore that objectionable? If the home version is going to be that way, forget it, I won't buy it!

Andy Hornbrook
Melbourne, FL

Will the Nintendo or Sega carts have the Mortal Kombat fatalities built in? (Ed. Lots of questions, Andy! First of all, Activision, rather than Midway will be doing the home versions of Mortal Kombat. They are planning on doing versions of MK for the Super NES, GameBoy, Genesis, Game Gear and Sega CD. Don't expect a whole lot of blood on the Super NES and GB versions as Nintendo won't allow it. That doesn't leave a lot of hope for the fatalities staying in, does it? Look for the gore to remain in the Sega versions as their policy on violence is more liberal than that of Nintendo's. As far as controllers go, the Super NES has enough buttons and when Sega's 6 button controller comes out the Genesis and Sega CD will be cool. How the GB & GG versions will work remain to be seen.)

Game in a Cartridge!

Planet Titan: It's a jungle out there filled with mutants, antimatter fields and other weird stuff.

New Washington: Find your memory (remember that?) then go under cover to avoid the Meats.

Death Tower: In a futuristic gladiator battle, it's a fight to the finish against replicants.

Paradise Club: You sniff out the aliens' burano plans but now they're on to you, dude!

Earth: Ops! Your identity is uncovered! Now robot cops want to pulverize you.

Planet Mights! Surprise! You show up at the aliens' HQ. They don't look happy!

Exclusive 14-page
Marvel® Comic Book
included inside the
package.

Flashback – the first game ever to pump awesome high-octane CD-ROM performance from a cartridge. The action screams along at 24 frames-per-second, just like movie animation. And after each level, the game moves along with animated sequences that are straight out of Hollywood. Excellent!

The Plot? You play the part of Conrad Hart, a GBI agent in training. You stumble onto a bizarre alien plot to conquer the earth. Now you've got to outwit and combat droves of replicants, deadly aliens, traps and other stuff too weird for words. No problem for a pro like you...NOT!

Still not convinced? Then check it out at your local game habitat. Flashback – it's like putting your Genesis into warp drive.

Shooter fans rejoice! If you thought *Gate of Thunder* was intense, then get ready for its super sequel, *Lords of Thunder*!

T.T.L. has really outdone themselves with this CD game. Set in a fantasy world, you take on the role of a brave warrior, fending off unimaginable enemies, including huge bore machines, sandpit monsters and fire-breathing serpents! Use your torch screw and flame whip to combat these mutant foes. Pick up various items along the way, like diamonds and crystals to increase your score.

Graphic cinema displays and parallax scrolling make this a winner!

STTI has found a new niche with their CD-ROM game system. The "Thunder" series of shooters is the most installable is at all, with plenty of targets and the cursory selection of alternative power-ups. Blend in some great looks and a rockin' soundtrack, and the end result is another reason to look at the Duo.

MWhat a game! This disc has some of the slickest tunes in any video game since *Gate of Thunder*. The graphics are incredible and the levels are big and nasty. The game play is very good, though there is a little technique as in G.O.T. Cool cinematics and spectacular sights and sounds make this a winner.

TTI is certainly on the right track with LOT. As good as *Gate of Thunder* was, *Lords* is even better. Great graphics, very challenging gameplay, and top music all combine to make this the best shooter I have seen in a long time. If you've been thinking about a CD, this is the game that will make your decision a lot easier.

SKiller tunes? Sharp graphics? Tight game play? You want it all? Get it! *Lords of Thunder* literally gets into your knees with its pounding guitar and gatar rhythm. I've never heard so much great music in a high quality game... now! If you own a Turbo Duo, you must pick up *Lords of Thunder*!

GAME OF THE MONTH

NOW YOU'VE REALLY GOT A FIGHT ON YOUR HANDS.

If you think the only way to totally experience Street Fighter II is at the arcade, get a grip on the one and only Capcom Fighter Power Stick. It's the only way to power up to full arcade play at home—for perfect execution of your Yoga Flame, Dragon Punch, Spinning Pile Driver and other favorite attacks. Its 8-way joystick lets you nail every move with minimal effort. Its six attack buttons have the exact same layout as the arcade game. And its three speed turbo-fire and slow motion features give you total fighting power without major finger wear. It even brings arcade style play to all of your other NES and Super NES games. With the Capcom Fighter Power Stick, you've just begun to fight.

CAPCOM

CAPCOM FIGHTER POWER STICK

Strap yourself in for a wild dogfight with Microprose's new flight and fight simulator, Super Strike Eagle!

Battle the tyranny and evil that has taken over the world by embarking on different bombing runs. For greater accuracy, the overhead view and the in-cockpit view offer two aerial perspectives. Pilot your bomber through dangerous missions that will test your shooting skills, as well as your nerves!

6 Super Strike Eagle attempts to tackle several game themes in the same cart and ends up being hot and cold. The dogfighting action is poorly executed and really bugs down when you otherwise a quite enjoyable aerial combat. When the graphic FX are turned on, you hit the target in the air, however, it's crash and burn.

7 I like the two different perspectives that you find in this game. The combat missions are done right and start out easy and get progressively more difficult. The graphics are very well done but could have had more detail. When the game really shines though is in the outstanding use of the Mode 7 scaling.

I was not too impressed by the graphics in this cart. The overall scenes are cool and the scaling is good. The first-person action is poor and I expected more out of the Super NES. The game play is decent at first but a lot of variety. The sounds effects and the opening scenes are good, but not enough for me.

7 Ever since Mode 7 came out, few games have really used the full potential. Super Strike Eagle just comes close with highly intense bombing raid scenes, and the good feeling of depth. Still, the down-out dogfighting really ruins the game a bit, when it should soar. All in all, it's a good title with a few rough patches!

Football Fury is not your ordinary game of football. American Sammy has turned it into a real tacklefest!

Choose from 27 teams in two conferences. With names like Grizzlies and Hunters, it's sure to be a funous fight to the goal line! A large play-book at your disposal lets you pick the best offensive plays. Bash your opponents into the ground if they get in your way, scaling and rotation add to the excitement when you score.

4 This game has an extremely attractive perspective and some exciting character animations, but the sounds, play-calling and overall action just aren't a nice set-up. The impact and excitement of the game just isn't captured in the title. What points Fury earns in presentation, it loses times two in execution.

7 There really isn't much room for another "normal" football game. I really did the right thing by taking the rules and throwing them out and starting from scratch. What they ended up wit is a spectacular game. Anything goes' football. Since video is the 'it' thing these days, Football Fury should do quite well.

5 I did not like this cart at all. The control is sluggish and the overall game is slow and boring. There are a few plays, but the execution is so poor that you struggle to get them going. The bonuses for touchdowns and halfbacks are OK and the rotation of the field is a neat effect. This cart proves to be a mediocre attempt at best.

8 Never in my wildest dreams did I think Nintendo would allow a game to fly. Football was never my sport, but I like it! While it could be a fun and incorporate a few more of the humor factor alone is enough to make you playing for hours! Just by being out of the referee or standing in the main field!

Rid the town of Tromaville of its waste in Sega's Toxic Crusaders.

Help Toxi, Nozome and Junkyard stop the evil Dr. Kill'emoff from polluting the land further. With their superhuman size and powerful moves, the Crusaders must stop the doctor's cockroach creatures and make their planet toxio-free again! Many levels will challenge their strength, though, including ones with bottomless pits and creepizoids.

5 Toxic Crusaders boasts colorful characters and well drawn backgrounds but little else. The interactive isn't bad guys and dangerous situations that kept up at a consistent pace and, consequently, the cart slows down considerably. Also, the characters are a bit small compact and overall the play technique is limited.

7 Toxic is an interesting game. While the gameplay is pretty good, the action is respectable and doesn't rush you to finish. His mop is an interesting weapon and helps maintain the environmental theme. It could have been harder but it's right for the younger player.

6 Toxic has a few promising features, but overall I thought the game was slow and uneventful. The graphics are good, and the music is even better. The game plays very well and the couple techniques that make it a little challenge. It lacks the intensity an action game needs.

8 Toxic Crusaders is quickly becoming one of my top titles for the Super NES. It needs a few more levels, but the technique involved is so good. Using your map to hold your own in other places is a great touch! The cart is solid as well, something you don't see very often in Super NES-land. Pick it up, I will!

Let your creative juices flow with SimEarth, the sequel to FCI's popular simulator SimCity!

The time around, you must create a planet, keeping in mind that you are responsible for making it an environmentally safe place to live. Humans will eventually make their appearance, and bring with them a multitude of modern-day problems. Try to preserve your utopia while learning a lot about the environment.

I like the idea of being able to grow a city (Sim City) or in this case an entire planet. The amount of effort in game demands, however, don't bother unless the rewards that successful players get. This is not a bad game, but it means, it's simply not going to appeal to those searching for snappy feedback.

Sim City was a great game to pass the time with. The ability to try many different "what if" situations was great...to a point. After a while it stopped being fun and I lost interest in the game. After all, this isn't a game you can win. Sim Earth is the same. The rewards are larger in scale but again, you can only go so far.

This game covers a lot of details and people who mastered Sim City may even be challenged. The game is filled with interesting problems and gives you a chance to see how hard it is to run a planet to support life. I am not usually drawn to this type of game, and even if you have hours to devote to it don't bother with this one.

Ever wanted to create your own world and run with it? SimEarth is just what I've been waiting for! I love being able to go in and make my planet thrive or see how it can tumble to its obitoin! The oceans are endless, and besides being a really is a great strategy game for SimCity fans.

Batter up for a great game with the boys of summer in HardBall 3! AJ Michaels announces this all-new heavy-hitter from Accolade.

Customize your game by choosing the batting lineup and even your team's colors. The Home Run Derby Competition really tests your skill while in the batting practice mode. A unique two-perspective feature allows you to practice from either the pitcher's or the batter's point of view.

The latest version of Accolade's Hard Ball series still plays like a great game, but this time you get some truly play-by-play by our man AJ. The game in which the words are placed on the screen is better than the Sega voice commentary. It's still edgy and without a score game to support the effect it fails.

Accolade has really pulled out all the stops in this cart. It's a 32 game season, the instant replay feature and the realistic player movements. The play by play commentary is novel at first but wasn't really needed after a few games. While too hard on the stats for me, some players will like this feature.

I do not like the way this cart looks or plays. The graphics are washed out and the sounds are not what I'm about. The game play is slow and there isn't much control over your team in the outfield. The stats are a addition but they don't add enough to the game play to keep this cart from striking out.

I really don't understand the great infatuation with stats in baseball games. I've seen games that do give you a life history about one particular player, but not deliver a good solid game. HardBall 3 is not a baseball game, it's a stat therapy! I couldn't stand the graphics, sounds, or lack of control. I can only call it sad.

Embark on a perilous adventure in a place called Risky Woods.

Electronic Arts brings us a heroic tale of magic and monsters. As a warrior, you must free the saints imprisoned in stone and save the land from evil. Set in a fantasy world, you will encounter beasts, puzzles, monsters, and even a nice against time! Use your steel weapons and fire to destroy these ferocious obstacles once and for all!

Put some nice computer graphics and swell computer games in a cart and your Sega can play like a computer. Only problem is the nature of PC titles doesn't translate well and although the action is good in style, it's enough to turn me off. Well made, but should have stayed on disk.

I really had high hopes that EA could do more than sports games. While this cart might get by as a fun game for the younger kids, it just doesn't have what is needed to keep a teenager happy. I found it harder than normal to control and this just made it more frustrating. Best advice, try it before you buy it.

This is the type of game that one would expect when you put a computer title onto a system with the standards for action games. The graphics are pretty good and the music isn't that bad, but the poor control makes the game frustrating and keeps it from being fun. The game could have been a sleeper.

EA never fails to surprise me on their taste for extreme. When they create awesome games and serious games. Luckily, we see more of the same but not, but some slip through, like Risky Woods. This game is a sorry graphics, with horrendous controls. This is the type of game we saw two years ago! lol!

Brain Transplant, \$39.99*

Here's a brainy idea: Pick up *Mystic Quest*,SM the world's first role-playing game especially designed for the entry-level player.

Easy-to-read icons put your head in the game immediately. Skull-tingling action keeps it there. Then there's constantly

SQUARESOFT

changing 16-bit characters and enough heady combat to scramble your synapses.

And a free strategy book offer comes in every box.

All this for just \$39.99.

Hey, you don't need to be a brain specialist to see what a smart deal that is.

Spring is in the air... and so is baseball fever! Acclaim warns you up for the season with Roger Clemens' MVP Baseball!

Select your team from two conferences and let your players perform before you make final selections. Play in exhibition games or jump right into a full schedule. The unique perspectives, cinema displays and instant replays add to the fun. This cart has got all the bases covered!

There's not much extremely critical that can be said about this baseball entry, but there's nothing wildly original about its execution either. The different angles that the game uses are nice, but the pitcher/batter control being well drawn, is still stiff. This game is deserving of a look, but far from a must have.

Baseball is a tough sport to make into a video game. Either you're overboard on stats or try to make it too well. This version tries to combine both but it ends up sacrificing some of the gameplay. Still it is the best version of the market but there is a lot of room for improvement especially in the pitching and hitting.

This is a very good baseball cart for the Genesis. The graphics are solid and the sounds are pleasing too. The game play is solid and there's more control in this cart than in most ball, there is not enough technique or variety in plays to keep me interested for long. A solid sports cart, but not great.

Roger Clemens' MVP Baseball is an excellent attempt to make the perfect baseball game. Unfortunately, it isn't what the gamers want. A good baseball title. The added features and slides are great, but I want speed. I don't want more stats, but more technique. While solid and a good rental game, keep waiting, I am.

Put the pedal to the metal in an intense racing game from Tradewest. Championship Pro-Am is an action-packed racer with twists!

Test your driving skill with 24 danger-filled levels and eight different track configurations. Choose from trucks, jeeps and cars before you begin. Launch missiles and bombs at your speeding competitors to slow them down, while you whiz past them to the finish line!

I liked the earlier versions of the Pro-Am theme for the 8-Bit systems. The better graphics and sounds do compliment the game play on the Genesis, but the extra 16-Bit power doesn't really spruce up the action either. This is a fun and addicting game nonetheless, and definitely and different kind of driver.

I liked the NES version and really expected to see a lot of improvement in the Genesis game. Unfortunately, it isn't there. The graphics could be a lot better as could the overall game. What's most important though is that it still is a fun game to play. With lots of levels, there is enough action for even the die-hard fan.

This is a fun game to play if you're in the mood for racing games. The graphics are good and the game play has all of the elements of a NES counterpart. The control is OK and the game gets intense in later levels. There are not any real enhancements other than in the visual and audio departments.

Championship Pro-Am really isn't anything spectacular. The NES version from the 8-Bit smash hit was a solid game, nonetheless. Very little has been added to this cool game, except better sounds and colors. If you liked the 8-Bit baby, you'll enjoy its 16-Bit brother. I am disappointed about the lack of major improvements.

Keep the roads safe from the forces of evil with the new CD driving game! As a member of S.T.O.P. (Special Task Operations Patrol), sit behind the wheel of a turbo-charged interceptor to battle the evil legends of S.C.U.M. (Secret Criminal Underground Movement)! As the driver you are armed with driving skills and machine guns mounted in the front of the car. Watch for the arrows, too otherwise it's crash and burn!

This game is a game of fun - the first time through. In the same theme as Cobra Command, the Wolfenstein game a driver that dashes out spectacular action, full-screen graphics and a storyline that's non-stop intense. The game is linear, however, and well over quickly by most anyone. Still a great shopping.

Very much like Cobra Command and Time Gal, Road Avenger is a new way of playing games. Not nearly better but new. In essence, it's a memory game. Get to a certain point you have to make a decision about something. Do it right and you go on and you die. Great background artwork! Try it!

Yes, the graphics are phenomenal, and the footage is much better than earlier attempts such as Time Gal and FX. The music and sounds are top notch. The main problem that I have with this cart is the lack of any real control over the game. You merely watch the car press a direction or button at an appointed time.

CD games are coming back with a vengeance! Road Avenger is yet another preview of what the Sega CD is capable of doing. While the control is horrible, the graphics are excellent - something the early titles have lacked. This is the type of game I'd like to see more of, with a greatly improved interface.

CHUCK ROCKS YOUR SUPER NES!

He's fat, he stinks and he's one of the best-loved characters ever to climb his way out of the prehistoric slime and onto your video screen. In this rockin' new 16-bit adventure for your Super NES, you'll join Chuck Rock on his belly-bashing, odor-kicking, rock-tossing mission to rescue his wife Ophelia from arch-rival Gary Gritter. You and Chuck, who's equipped with a pea-sized brain and nuclear body odor, have to crush some pretty strange

characters, like the wild and woolly marmoth, one mean triceratops and a saber-toothed tiger who's permanently hot under the collar. Together, you and the Chuckster swim through swamps, travel up volcanoes and shiver your way through the ice age — all in the name of love!

Nineteen levels set in five prehistoric worlds. Eye-popping graphics and very cool animation. If you wanna rock, you gotta get Chuck Rock.

Attention all sports fans! T.T.I. has got a cart for you! World Sports Competition challenges only the best athletes from around the globe.

Choose from six events, each with subevents for a total of 18 different events. In the Olympic mode, you will play all events and attempt to beat the world record. Digitized voices really add to the realism, especially during the nightly newscasts. Swim, jump or run to be the best!

T.T.I. takes a stab at Track & Field games with this entry. No one sport is particularly exciting, but the overall game and especially the heavily edited multi-player options are what give me the best impressions. The graphics and sounds are adequate and most of the events boast smooth interaction.

If you like a lot of variety in your sports action, then you will probably like this cart. Eighteen events. While none are particularly outstanding, the idea of being the best and holding the record (especially among your friends) is one of the goals in this game. A good game to have out at a party when a bunch of friends are over.

A good attempt at bringing the fun of the Olympics to the Turbo Duo are a number of cool events. Overall, the game remains fun for quite a while. Choosing a friend is probably the most interesting about it. The variety is what keeps this cart interesting. Try your best to beat the World Record, you may be surprised at what you can do.

World Sports Competition is perfect for the Turbo owner who really craves sports action (thanks to a host of decent titles for the Turbo Duo). While not an outstanding sports game, it offers enough variety to keep sports game fans entertained for a while, maybe long enough to buy a new game shows up. It's an above average game.

Take control of the F-117A, the nation's most hi-tech bomber. Pilot the Stealth Fighter through global "hot spots" in this latest flying adventure from Microprose. Shoot down enemy planes and tanks over Libya, Baghdad and even Kuwait! Don't forget to return to your base to refuel once in a while. Real voice along with cinema displays simulate aerial combat perfectly. Master your control panel to be an 'ace' pilot!

This game just doesn't have enough punch. The emphasis on flight simulation is reassured by the use of the NES to reproduce such effects and the targeting battle sequences are able to muster up the necessary excitement. Overall, the game attempts too much and ends up delivering little.

As a flying game this cart is quite good. The reasons are obvious: real life and the action is OK. The only no means is a flight simulator though. There is just no excitement in flying the plane. The attack sequences left me disappointed due to the lack of background music detail. A good game to try but leave the helmet behind.

NES games are going to have to be better than this to succeed in the market today. The graphics and sounds are very weak. Trying to get the off as a flight simulation is a good idea, but the game play is lacking any real excitement. There just isn't enough there to keep you in front of the tube for very long. Weak power-ups, too.

F-117A Stealth Fighter? Licensing plane names? I'm not impressed by its fancy title, nor by its 8-bit graphics. Good NES games are getting harder and harder to come by these days. Even, F-117A is a relatively solid game, but can only hope to keep players entertained for a few minutes. The fun just isn't in there.

Grab your cue stick and chalk for a great game of billiards in Breaktime: The National Pool Tour from FCI. Take on all the pool sharks in games like nine ball, eight ball, rotation and 14-1. Wage a bet with a friend, play against the computer pro, or simply sharpen your trick shots in the practice mode. Start out beating an amateur and win your way to a spot on the National Tour. Rack 'em up!

FCI has taken earlier pool titles and spruced up the graphics to play realism to a level that is truly enjoyable. This game won't appeal to everyone, but the options and controls are really appealing. Whether you love the game or not, Pool Tour makes for a relaxing way to wind off some time. I liked it!

I liked the many different ways you had in playing this game. Billiard is pool and not everybody is good at like this type of game. FCI approached the sport the right way by offering realistic trick shots are great to pass time and playing the pros is a real challenge. I think they cheat though.

There is very little that is original in this cart, but the game play is solid and well-come in this age. For NES soft, I like the options that you had and the different ways to play this game are a plus. If you're really into playing pool, then go for the Championship Pro Nationals and play the toughest pros in the country.

Since all of the past pool games for NES have gotten boring, Breaktime is a deep breath of fresh air for me. While it doesn't show off the controls better than previous titles, I must admit, it still isn't awesome. I can't do for now, it seems the NES is really losing its programming support to the Super NES.

Your favorite prehistoric family is back, and this time you can take them with you wherever you go!

The Flintstones from Taito is a fun-filled adventure for your portable GameBoy. Fred sets out to find a hidden treasure, hoping to give it to Wilma for their anniversary. Follow him through seven levels, fighting off piranhas, aliens and cobras! Dino even gets in on the action when you pick up his icon. Yabba-dabba-doo!

Like other action titles reviewed on these pages, Flintstones is a one-age hit that combines a solid on-screen play mechanic and spices it up with familiar characters and solid challenges. When the game moves along at a slower pace it's more enjoyable and a little more rewarding. A very good addition to the GB library.

Taito did a good job in bringing the Flintstones from TV to home systems. The GameBoy version is really well done as the graphics are very good and the game is one of the best playing carts this side of Mario 2. There are plenty of things to find and lots of obstacles to get in your way.

Flintstones is a great playing cart for the GameBoy. The graphics are also very good, with almost all of the familiar faces you remember from the cartoon series. The game play is solid with items and plays a bit like Mario. You even get help from the cave's best friend, Dino. The blurring is a bit hard on the eyes.

Surprisingly, Flintstones for GameBoy is really a fun game - especially on GameBoy screen. It's hard to lower a game's score because the hardware stinks, but it makes me even into consideration it SHOULD have gotten a seven.

If the only dunking you've been doing lately is with coffee and donuts, try the hot new portable Arch Rivals from Flying Edge.

Take to the court in a two-on-two match for a brawling game of basketball. Master the moves of offense and defense to annihilate your opponents. At halftime, sit back and watch the cool cinematics or catch up on the latest news from the sportscaster. Go for the slam dunk!

The GB version of Arch Rivals was designed with good logic in mind and that emphasis is apparent when you start to play. The most noticeable element from the action is the absence of the punching and fighting that is the trademark qualities of the arcade game. The interaction is good, but this is not Arch Rivals.

There hasn't been a good basketball game for the Game Gear, and this version fills that niche very nicely. While the action isn't as rough as though as that in the NES version, the game is solid and offers plenty of excitement. The ball is somewhat hard to see on the small screen but you get used to it.

I was not too impressed with this cart. The graphics look good on a portable and the sounds are typical of the 8-Bit. The game play is good, but lacks the control of the 16-Bitler and there isn't much difference between the cart and a regular basketball game. There's all the rough and tumble action we expect?

I like this game just because I love the arcade, and I have always wanted to blow it on the road. The Game Gear version doesn't disappoint me in the least, and I'm happy to say it really brings back some great memories. Every possible detail (other than the decline in graphics quality) is intact!

Welcome to the Stone Age! Dinolympics is an interactive puzzle game for all portable fans.

Join fellow tribe members on a search to discover the spear, fire, and the wheel. Along the way you'll encounter ferocious dinosaurs and mean covenants! Work as a team and make decisions together or face extinction! It is also your job to save those humans who may wander off. Can you find the Missing Link?

Dinolympics is a nice game that won't turn any heads, but the action does offer some humorous moments. The execution is flawed by a lack of consistent interaction, but the events that the game draws take you and off that fact. The events that you compete in are fun for the most part, but not overwhelming.

Who says that a game can't be both cute looking and fun to play? This game does both! The puzzles are also too difficult and this makes the game enjoyable for players of all ages. With very good graphics and excellent control, Dinolympics is a game that everyone will want to have. Very addictive gameplay.

This cart reminds me of Humans and Truck and Field. There are a lot of cute events and plenty of laughs in store for you. The graphics are good and the game play is solid enough to warrant a couple plays. The puzzles are a bit easy at first and get progressively more difficult. A cute and fun game to take on the road.

Okay! This is a game that can make me laugh! Dinolympics is almost too outsize and humorous for its own good! The game play loses a bit of luster while being smothered in hilarious puns and comedy spots. The colors are bright and vibrant, just what the screen has been needs. Just call it another decent game for the Lynx!

IF IT'S ON THE TOUR, IT'S IN THE GAME.

It's tee time. And your chance to join the world's most exclusive tour. The greatest golfers, the toughest tournaments, the biggest prize money. Everything you'd expect from the PGA TOUR.

It's all here in PGA TOUR Golf II. The brand new version of the greatest golf game anywhere.

You go head to head with 60 of the best pros ever

to stalk eagles. Like Couples, Lietzke, Stadler, Sindelar, Azinger, O'Meara. All the big money players.

PGA TOUR II delivers a much bigger course in golf. Six unique TPC courses and a fantasy course.

Including these new ones: the TPC at Eagle Trace, TPC of Scottsdale, and TPC at Southwind. And five actual PGA TOUR tournaments. Plus the ultimate big money shootout. A new skins challenge on any course.

Every hole designed from the original course blueprints. Right down to each hazard, bunker, green, fairway, and rough.

Take your best shot at the new skins challenge. If you're on top of your game, you'll hit the big payoff!

PGA TOUR II now has a hole-in-one meter for hitting extra-perfect tee shots.

The 3-D putting grid rotates so you can see every wrinkle. Use it to read every green like a pro.

With each course built from the original blueprints, you face all the hazards the TOUR pros do.

So now you go a lot farther on the PGA TOUR. With awesome new graphics. A fade and draw meter for improved shot control. More stats than ever. Like average hole scores vs. par, number of holes in one, your winnings in the skins challenge. And new digitized sounds including sports-caster Ron Barr as the tournament announcer.

You better be on the ball if you want to win any prize money. The roughs are a jungle, the sand traps, a desert. Wind conditions and 10 ball lies can drop you from the leaderboard faster than you can say bogey.

Luckily, 10 TOUR pros give you a course on how to play each hole. They'll even play right alongside you. And rotating 3-D putting grids give you a map on how to attack the greens.

EA SPORTS™ coverage follows every bounce of the ball. With multiple camera angles. Instant replay. A new Hole Browser™ that lets you be the cameraman. Plus battery back-up saves it all: tournaments, players, prize money, and stats.

Score this game of golf. Call (800) 245-4525 anytime. Or see your local Electronic Arts dealer. And go the distance on the PGA TOUR.

If you're on top of your game at tournament play, you'll make a name for yourself on the leaderboard.

A whole course used for golfers. Six TPC courses. Plus a battery course.

...Yo, ho, ho, gamers, 'tis the guru of gossip, Quatermann, back once again with a special CES edition of the GG that has none of the embarrassing garlic odor found in other gaming mags! Las Vegas was in a particularly festive mood this year, even though yours truly had to actually pay for dinner a couple of nights because the game co.'s were apparently feeling strapped for the green stuff (if only I had bought that thirty millionth cartridge maybe Nintendo would've busted for the party favors). Regardless, there were plenty of things to do and see in the south hall and just so credit is given where credit is due, both Acclaim and Namco sprung a few tameles to keep Andy, Ed and the rest of the press hounds at bay. Straight from the Uncle's mouth - don't look for the Genesis 2 or Sega CD 2 to appear in the U.S. The head honchos at video game-dom's big blue concede that the Q-Mann was right about the sequels, but only Japan will be graced with the game systems...

...While we're talking hardware, this dog of war heard from not one, not two, but three (count 'em) three program heads who all insisted that Atari's new Jaguar can out-shoot the new 3DD wonder machine! More technical ability can be found, according to those in the know, in the Flare-inspired shell that is now going through final prep in Texas than any other machine in existence! What's the catch? As previously reported by the great Q, the knuckleheads at Atari decided to leave the RAM out of the console to save some pennies and, in the process, left the hulky hardware singing high soprano! Bet you use one-ply, don't you Sam...If this is a counselor's ship, where is the ambassador?...Pioneer's new MKey, er, L.I.F.E. system was a real surprise! The laserdisc games were wicked awesome and the Sega/Turbo compatibility pulls some nice kick. Still prozy, but quite cool...

...What do you get when you invest millions of dollars into a multi-media studio to produce CD games, put the Sega name on the door and then wait almost a year? Nothing!...On the flip-side for Sega, their new Virtual VR virtual reality glasses (which make you look like a lawnmower man) are rumored to have a special 3-D version of Virtua Racing in the works. I'll have to see it to believe it...The character generator that Acclaim showed during their wing-ding looked cool. It's a program that traces the movements of human characters who are wearing a special outfit covered with sensors and then fills in the rest of the picture over time with computer muscle. As much as the technology wowed the Q-Mnator, I laid eyes on a similar system later in the show that rendered the graphic pix intensely! Venom still looked awesome...Speaking of comics, Malibu will be unveiling the SF 2 comic book later this summer and Williams has just produced their own for Mortal Kombat. Look for them at the comic shop near you. Also while you're at the comic book store, watch for a new mag that's destined to dethrone the magician! Not only does HEROQ have some awesome edit on the latest comic book info, it has the Q-Mann covering video!

...As you'll read in this ish, the Super NES CD-ROM is far from vaporware! The "ultimate peripheral of '93" is well into the final stages of design and according to the ultra-secret paperwork smuggled out by some hard-working rebels, you too can feast your eyes on the latest marvel of Nintendo. A formal developer's conference will gather soon and the Q-Mann will be there...SNK's CD add-on is rumored to be looking arty...Q-Sound, the incredible new stereo sound generator, is rumored to be finally making its way into game carts...Watch for Street Fighter 2 characters to start appearing on just about anything man-made. From an upcoming pinball machine to Fruit of the Loom underwear, the World Warriors are coming (hey Capcom, send these guys to the WWF - you'll make a fortune hawkling Blanka brand deodorant)...

...Finally, the Q-Meister pulls his picks from the CES: No big winners, but Flashback was good and Mortal Kombat will zap some big ones this summer on all formats (a Gameboy version? Why?)...Sega, where were the Menacer and CD games? You missed an op to make Starfox out to be a turkey with your Slipheed game - the CD polygons blow the SFX away...Jurassic Park will likely dethrone Prince of Persia as the most ported title (the early Super NES mazes from Ocean looked cool) and Empire from Lucas/JVC was definitely the hottest game not shown at CES (but where's the Return of the Jedi? I want to kill Ewok!)...One final memo from the show - Sega has a U.S. team hard at work on Sonic 3 for later this year. Until next time, remember you ain't never had a friend like me...

PIONEER DEBUTS NEW CD GAME SYSTEM!

In a surprise move, Pioneer announced at the Winter CES that they would be bringing out a new CD interactive multimedia game system called LaserActive. Based on their popular laser disc player, Pioneer has opted to create a system that goes beyond the Sega, T.T.I. or upcoming Nintendo CD-ROM systems, and goes head-to-head with the elite 3DO. Whereas the current systems use the 4.4 Gigabit CD to store the normal digital game data and audio, the LaserActive does the same, plus adds in up to 60 minutes of broadcast quality, full screen, full motion laser disc video and FM sound!

As if that wasn't enough, Pioneer has made their LaserActive system the world's first multi-platform inter-

active machine. Working with Sega and T.T.I., Pioneer has taken the two CD game systems and condensed each of them down to the size of a small car radio. Much of the space reduction was accomplished by modifying the laser pickup in their machine to play all of the game, CD audio, CD+G, karaoke and laser

video discs. The remaining electronics make up the optional modules which will play the respective game companies' cartridges. These modules plug into the front of the LaserActive system.

Want even more, both Sega and T.T.I. have agreed to make new games using the LaserActive format with full motion video!

On the down side, like the 3DO multimedia system, Pioneer's LaserActive will not be cheap. The main system is scheduled to cost about \$720 and each of the game system modules about \$450.

Pioneer states that they will have their LaserActive systems in stores in Japan and the U.S. this Summer

TRUE ARCADE ACTION. You'll find that the only thing missing from our new Super Advantage is the coin slot. Okay, so we added an extra long cord. And our joystick is easier to carry than an arcade machine, not to mention a few thousand bucks cheaper (that means under \$50, suggested retail price). Bottom line is, this is about as close as you can get without grabbing a crowbar and—well, you get the picture.

The layout's familiar, and the construction's tough enough to handle the most intense street fight or the ultimate battle for the universe. We've also added a few features you won't find in the arcade—state-of-the-art effects designed specifically for today's most radical games. No wonder we call it this...

PRODUCTION SUPER NES CD-ROM SPECS REVEALED!

In order to allow game developers sufficient time to have new CD-ROM software available for the early 1994 launch of the Super NES CD-ROM peripheral, Nintendo of Japan wrapped up the development work on their Super NES ND (Nintendo Disc) Drive last December. EGM has been able to get the final specs and system configuration from Japan and this peripheral really looks hot!

ND SYSTEM PACKAGE

The Super NES ND Drive (the official U.S. name hasn't been decided yet), when it comes out, will consist of three parts: the ND Drive, the ND System Cartridge and the CD-ROM AC Adapter. The ND Drive will be 9 1/2" deep, 7 7/8" wide and 2.9" thick (the same size as the Super NES) and it will weigh 2 lbs 7 oz. The ND System Cart will contain the majority of the "brains" and will plug into the cartridge slot of the Super NES. There will be a cord from the system cart to the ND Drive that will transfer data and/or power.

GAME SOFTWARE

In a bold move, Nintendo will deviate from the standard "bare CD" format that Sega and T.T.I. use. Each of Nintendo's game discs will come in its

Last December, Nintendo finalized the specs for their Super NES ND (Nintendo Disc) Drive.

own CD caddy as merry computer CDs come now (see photos)

In addition to this change, Nintendo will build in a software security device that will make illegal duplication of the software impossible. The custom case will also contain 256 Kbit of back-up RAM for game data storage.

ND DRIVE CD-ROM SPECS

Most of the specifications haven't changed from the ones we reported back in the March and June 1992 issues of EGM.

The co-processor will be 32-Bit and it will run at 21,477 MHz. There will be 8 meg of memory on board plus another 1 meg of PS-RAM sub memory, plus 2 meg of ROM. The games

will be XA compatible (playable on Philips CD-i machines).

What is new, is that there will be an additional 4 megabit of supplemental D-RAM memory built in.

There also will be a new CD-ROM decoder, code named HANDS (Hyper Advanced Nintendo Data Transfer System). HANDS is a custom chip which basically consists of another processor - a 65C02 (which will run at 4.295 MHz). The reason for HANDS is that it will allow the main memory (8 Mbit of D-RAM) to be read without having to stop the work the co-processor is doing. It's kind of like multi-tasking. HANDS will automatically help in some of the data crunching by converting graphic data to character data for the Super NES.

Stay tuned, as next issue we will delve even further into Nintendo's new top secret 32-Bit wonder!

LEADING EDGE

MYSTIC WARRIORS

Following the success of other multi-player action/adventure games such as *Turtles in Time* and *The X-Men*, Konami has released their latest coin-op. *Mystic Warriors* is an epic adventure in which the heroes must fight the forces of evil in some exotic places around the world.

The end bosses of each level are as difficult to beat as they are fun to watch.

The warriors even end up on a snow-covered mountainside sking for their lives against mechanized hovercrafts.

Players will also love the nasty bosses which must be defeated at the end of each level. If you enjoy a cool adventure game, take a shot at *Mystic Warriors*!

You can play as one of four characters; each of which has a set of special moves.

• HOW IT RATES •

*Konami scores big once again! Even though some of the action tends to become a bit repetitive at times, *Mystic Warriors* has some very original touches.*

The graphics are well done with lush scrolling and beautifully animated characters. The music leaves a bit to be desired, but overall it's tolerable. The four-player option is great and definitely adds depth to the snowy battle-fest.

*In short, a great title with a lot going for it, *Mystic Warriors* will be sure to draw many players due mostly to its high excitement level.*

WILD PILOT

Blast your way past enemy aircraft while trying to stay clear of other obstacles.

Prepare yourself for something really wild, *Wild Pilot*, that is! This is one flying game that packs a wallop!

You will take part in many different missions where your only defense is your rapid-fire machine guns and

your aerial expertise! You'll engage in heated dogfights with everything from huge bombers to state-of-the-art jet interceptors. The graphics are stupendous as well as the digital stereo sound.

Wild Pilot's advanced soaring and killer sound effects will blow you away!

DINOREX

With the resurgence of interest in dinosaurs lately, we knew it would only be a matter of time before we'd be playing a dinosaur video game. *Dinorex*, by Taito, features some of the coolest dinosaurs doing battle in various locales. Storm through the streets of a crowded city as the inhabitants run in blind panic. Confront armies in tanks as you

Richly detailed graphics enhance the look of this Paleozoic coin-op.

ramble through the charred remains of urban businesses. Command the omniscient Tyrannosaurus Rex as it does battle with its lunch-to-be, an unsuspecting Triceratops.

This quarter-sucker will leave your mouth hanging open wider than a Brontosaurus' hiney! The dinosaurs animate so smoothly, you'll

swear you're watching the real thing; not that you'd know what the real thing looks like! Another special feature is the two-player mode, where things really get exciting!

The sound effects and the control of both dinosaurs and their human counterparts are excellent. This is a very imaginative game!

For a real blast from the past, sink your teeth and quarters into *Dinorex*. And you thought they were extinct!

Leave a trail of destruction as your dinosaur lumbers through the city.

Take It To The Streets...

CRASH™ THE BOYS™ STREET CHALLENGE

"Crash" Gooney and his posse from Southside High own every sports record in Spring Hill history. Legends? Heroes? Not in this town—where Todd Thornley and all the rich scrobs up on the Hill think Southsiders are low-lives.

So Todd and the silver-spoon mama's boys at the three "Hillier" schools have issued a desperate challenge to save their fading reps: Let's take it to the streets in the Southside...no rules...no refs...no penalties—and we'll see who comes out in one piece.

And just in case the Hilliers can't handle Crash 'N' The Boys, Todd's rich daddy has fielded Team Thornley—a ringer group of super-athletes from Thornley Industries.

Five radical events. Five motivated teams. Five members per team. Only one winner.

Southside's Crash Gooney sets another 400M high in the street race! Crash and the Southside Boys—Chest, Hicks, Orphey and Ding-Bey—put the Hilliers in shape.

Todd Thornley attempts to let go and takes a ride in Hammer Throw Girl's 1000-lb. Nightlighter. His team has been humiliated by Crash once too often. This time it's personal!

"Sneak" Spazzler, Jefferson High's captain shows his lethal powers in the Water Slaughter. He thinks Lizardo and Washburn are almost as bad as Southside. Almost.

Artie Kim Stryker wants Iron-rod to lowering metal at the Gyroline Scramble. Lizardo High's team captain dispatches the Southsiders—especially Crash.

Rocky Rockwell makes use of the Apocalyptic paper kick in the Judo event! The skills, computer-generated Team Thornley is out to crush Hillier and Southsiders alike.

THE GAME DOCTOR

A Spritely Question!

Welcome to the latest installment in electronic gaming's ongoing quest for knowledge.

Before we jump into the question pile, however, I wanted to thank everyone who has contributed to the "Draw the Game Doctor" contest—some of the entries were absolutely fantastic! I hope to print several of the winners right here in the next issue and award the various Game Doc Prize Packets.

Q: I'm a great fan of your magazine and I find your section particularly informative. My question is: when I read reviews of games, I constantly come across the term "sprites."

What is a sprite? When I read a review on a game I'm thinking about getting and it says "big, chunky sprites," is that a good thing or a bad thing?

Gareth Halley
Kambah Act, Australia

This first boss in *Contra 3* is an example of the sprite technology.

A: Sprites are the animated characters which appear in video games, like *Mario* or *Sonic* the Hedgehog, or *Bubey Bobcat*.

Early in the design of the first programmable video game systems, the developers saved lots of memory by making sprite or character animation a part of the basic hardware. Some early home computers, like the *Apple II* series, required large amounts of memory to animate characters because they had to be manipulated through an extensive programming code.

LETTER • OF • THE • MONTH

Q: I got a GameBoy for Christmas and as I looked through the manual, I noticed a warning not to use rechargeable batteries. What is the reason for this?

Garrett Masul
Union City, CA

A: Two reasons, Garrett. The voltage on rechargeables is slightly lower than ordinary batteries and won't generate enough power to run the system. Also, nickel cadmium batteries tend to heat up—so never use them together with ordinary batteries!

Q: In the January issue of EGM you said that Nintendo will release a 32-Bit Super NES and a 32-Bit CD-ROM. Will the existing Super NES and the 32-Bit CD-ROM be compatible?

Mario Banks
Atlanta, GA

A: I think you misinterpreted my comments in the January issue, Mario. Nintendo actually announced that it did not feel that 16-Bit technology was sufficient to maximize the benefits of CD technology. Therefore, Nintendo says that it will release a CD-ROM drive for the existing Super NES which will upgrade the Super NES to a 32-Bit system. So there is no new version of the Super NES on the way.

The only real question seems to be when, exactly, this CD-ROM drive will appear on store shelves. Nintendo originally promised it would arrive in time for next Christmas, but most industry observers believe that it will not appear until 1994.

Nintendo plans to bring out a 32-Bit CD-ROM drive for the Super NES.

That about wraps things up for this issue. Remember to send all questions, corrections and comments to **The Game Doctor (EGM)**, 330 S Decatur, Suite 152, Las Vegas, NV 89107.

GENESIS
ONLY ON SEGA GENESIS

ARE YOU TOUGH ENOUGH FOR THE ULTIMATE FIGHTING CHALLENGE?

FATAL FURY is here, and only Takara brings back all the power and glory of the original arcade master to the SEGA GENESIS home market. Witness fast animation and realistic graphics from among three fighting heroes — each with his own unique style of fighting — as they take on nine enemies, each possessing their own fighting skills and hidden powers. They're tough, tough as they hurt enemy. Their enemy? Computer, even better! And the winner? You, who can unleash your own fighting force. You can become a King of Fighters.

The battle is joined on a journey through the mean streets of South Town. Fight hard as you roam the streets of the beach or amusement park, or as driving rain clouds your sight at the Chinese Temple. Stunning animation and horizontal scrolling reveal new areas of the challenge, as attack after attack is met and mastered. Eight locations in all, each with unique backgrounds, animation, music and sound effects.

Eight characters leap right off the screen. Special skills, magical powers and multiple attack moves combine with lightning speed to create the perfect fighting action game. Take on the computer or another player's head-to-head. Are you tough enough to handle the challenge of FATAL FURY and become the KING OF FIGHTERS?

quite young and very avid game players. While it is not true of all American software designers, most major in programming and don't have a lot of experience with video games. Japanese companies take a different approach that stresses an understanding of how good games operate. Because of this philosophy, many young game players have gone on to create exciting titles like *Street Fighter 2* and *Super Mario Bros.*

In America, most games are also created with input from far fewer people than a typical Japanese title. Just watch the credits of any popular Japanese game. Most American softs are created with a handful of people. More input from a wider number of game players would probably help many companies produce better games.

Speaking of programmers, the people who design games in Japan are widely recognized for their skills and sometimes get mobbed on the street! And most use odd names to keep their real identities a secret!

As far as the games themselves are concerned, Japanese game players are more interested in role-playing games that have long play value and unique storylines. The most popular series of games in Japan is not *Super Mario Bros.* or *Sonic the Hedgehog* like you might think, but *Dragon Quest 1, 2, 3, 4,* and now *5* for the Super Famicom. Each time a new *Dragon Quest* game is released the lines get longer, kids skip school and some people have even been nudged for their valuable carts! If you look at a Japanese video game mag, most of the highest review scores always seem to go to RPGs. Action games like

The game consists of four stages with 12 areas each. Enemies can be wiped out using power-ups like 3-way shot, claymore mines, reflecting lasers and homing missiles. Once you complete all the areas within the stage, you must face a mechanized robot protector face-to-face within the deepest corridors.

INTERNATIONAL NEWS

Mega Man and Ninja Gaiden always score low. Many times, however, popular game characters will leave their typical side-scrolling action environments and journey into a RPG world. In fact, one of the hottest rumors floating through the Japanese press concerns a new RPG game from Capcom that uses Street Fighter 2 characters! Imagine that!

One of the most noticeable differences between you and us is the way we buy our video games. Over here, games are released on specific days, kind of like movie releases in the U.S. When the time approaches for a really popular game to appear, news stories run on television and long lines form outside stores. It's too bad game companies don't embrace the same practice in America. Unfortunately, Nintendo controls when games come to the U.S. and many times the release schedule gets pushed back. Also, once a game has been on the shelves for a couple of weeks, it is discounted heavily. When I went to the store yesterday I found a Super NES game released just three weeks ago selling new for under 1200 yen (about \$10). Popular games like Street Fighter 2 and Sonic 2, however, still command a high price.

The stores that sell video games in Japan are unlike the places you go to snap up soft in the U.S. The most popular stores discount new games to get people to come. Yodobashi Camera is the Akimann's fav hangout, although Toys R Us is becoming a favorite shopping place in this country like it is in America.

When the Nintendo 8-Bit was still popular, as a matter of fact, there was a special floppy disk accessory that was sold by the company. Once enough players had the unit, Nintendo erected special software booths on the street just like phone booths! You could go to the station, put in \$5-\$15, and then pick the game you wanted! The machine would duplicate it and a disk would be ejected! Unfortunately, many people abused the service and copied software illegally. It's unlikely we'll see a similar unit for the Super NES.

STAGE SELECT, SUPER SONIC & DEBUG

The ultimate code for Sonic the Hedgehog 2 has been discovered! First, go to the title screen and scroll down to the options. Press START on controller 1. When the options screen appears, highlight the Sound Test box. Now, with the pad, change the

numbers of the sound test and play them with the B button in this order: 18, 65, 9, 17. When you play song 17, you will hear a distinct ring sound at the beginning of the song. Press the START button to exit back to the title screen. When the title screen appears,

hold the A button and press START and you will see a level select screen.

You can do another trick within this screen. Highlight the new sound test within this screen and play these sounds in this order with button B: 4, 1, 2, 6. Choose any stage in the level select screen and when you are in that level, collect 50 rings and jump in the air to become Super

Sonic! Press START and then A to exit the level.

One more trick is the debug. Highlight the sound test in the level select screen and play them with button B in this order: 1, 9, 9, 2, 1, 1, 2, 4 (Sonic Tuesday). Now choose a stage and hold button A and press START to enter it. In the level, press B to change into an object, A to change and C to duplicate.

Access the Sound Test and play sounds in the right order.

A level select will appear. You can do more tricks from here.

Be Super Sonic with more codes from the level select.

It's the new Sonic 2 debug! Turn him into many objects.

SECRET DEBUG TRICK

This is the ultimate trick for Super Star Wars! It is a debug within the game that allows you to do some incredible tricks. First, go to the title screen and press these buttons in this exact order: A, A, A, A, X, B, B, B, B, Y, X, X, X, X, A, Y, Y, Y, Y, B. When you hear the Jawa yell, you will know that the trick worked. Press START on the first controller and you will see that you have the choice of three characters to control. You can choose Luke Skywalker, Han Solo, or Chewbacca. Now when the game starts, you can be in control of Han or Chewie instead of Luke. But, that is only the beginning. On controller 2 press and hold the top L and R buttons while you are in the level. This will bring up the game debug menu. On this screen you can manipulate just about anything in the game, such as changing the area, stage, increasing your lives, health, changing your

hero, and your weapon to anything you like. When you are ready to go back into the game after making the changes, press START on the first controller. You will be brought into the stage you choose, with the number of lives you designated, and the weapon you decided on. If you are having trouble completing the level, or want to go on to the next, just press START on controller 2 while you are in the level. It will say that you have cleared the stage and you can go on to the next. One more thing you can do with this trick is to give yourself invincibility! To do this while in a side-scrolling level, use controller 2 and press and hold the A, B, Y, X, and SELECT buttons. Let go of these; you will see X and Y coordinates by your character. Your hero is invincible and can even walk through walls!

Ken Fogelman
West Hills, CA

Do the trick at the title screen. You will hear the Jawa yell.

Start your game and you will be able to select your hero.

Any hero can begin in the side scrolling scenes you choose.

Press the L and R buttons on controller 2 for the debug.

All of your settings will be there. Press START on...

...controller 2 to clear your stage. Invincibility is below.

SUPER NES

You heard it first at EGM!

One of the most popular fighting coin-ops since SF2 is about to make its appearance on the screens of the Super NES, and of all systems, the GameBoy!

Like in the arcade, you can choose from seven characters. All of them are present: Kano, Liu-Kang, Sub-Zero, Sonya, Jonny Cage, Scorpion, and the powerful Raiden. Not only that, but there are two boss characters, Goro and the powerful Shang Tsung, who can morph into any warrior at will and use all of their powers at any time!

The game will remain the same, because like its main competitor, it will use 16 Meg of memory to make sure that the detail is not lost in the conversion. As you can see, the detail is ported straight from the arcade: the cool shadow effect of the fighters was mimicked perfectly.

Well, now that all those pleasures are aside, the main question that everyone will be asking is, will it still be the psycho-waste-em-all bloodbath complete with finishing death moves that the first one was? It is highly unlikely that Nintendo will

MORTAL KOMBAT

let Akclaim keep the fatalities in, but keep reading EGM for the inside scoop on this hot title for all formats. Now check out our super pictures straight from Winter CES!

FOR THE SUPER NINTENDO!

Even the stage with the stone statues of the warriors is done with uncanny detail!

Can you tell the difference? What you're looking at are the actual Super NES pit!

SUB-ZERO

Like his name suggests, his ice blast will instantly freeze the strongest foe, and his speed is to be reckoned with!

SCORPION

Scorpion is here with a deadly grappling hook that locks into his victims' bodies and pulls them to him.

LIU-KANG

Liu-Kang can best be described as the speed demon of the entire fighting crowd. His flying kicks are lethal.

Even the stage with the stone statues of the warriors is done with uncanny detail!

SONYA

This highly trained military woman has many grappling attacks as well as a devastating air attack! Ouch!

JOHNNY CAGE

Johnny cage has green fireballs, splits punch, and a sliding shadow kick at his disposal! Deadly indeed!

KANO

A nasty head smash, spinning blades, flying rolls are the mostly what his attacks consist of.

RAIDEN

The master of energy, he can teleport, fire lightning, or launch his body for a crushing blow in the chest.

COMBAT

AND IN THIS CORNER...

Flying Edge is also about to release the all-out fighter for all the Sega platforms! Now you can play if you have a Genesis, a Game Gear for on-the-go stress relief, or truly let the power fly and pick up the Sega CD version! This version

will be just as close as the Super NES version, except the Sega CD version will have better audio. Not only that, but it is probable that ALL of the blood will be kept in as well as the fancy finishing moves.

The cartridge version for the Genesis will also be 16 Meg and the portable versions will be much smaller for obvious reasons. The CD will be an enhanced version of the cart with superb music and sound effects. Unfortunately, there is not much to show, and for some oddball reason, they have all the characters done, but the scenery has not been defined.

A new controller may need to be fashioned for the Genesis and Sega CD versions. The Sega six button controller may be the answer to how this game will be played on a system with only 3 buttons. The game play on the Game Gear version may have to be cut down a little to accommodate the portable's permanent 2 button configuration. Now lets take a look below to see just how far along the Sega versions are. You'll get a chance to check it out with a side-by-side photo of the Super NES version to just see how they compare.

FOR THE SEGA GENESIS!

Since the Super NES is going to get the game, why not all the systems? So, there will be a cart, portable, and CD version for the Sega systems. The only difference is that there should be blood and extras in all their detail on these versions. We will see how each version will turn out in the near future.

At present, the moves are being concentrated on, then the back will be added.

THE DEADLINESS OF SONYAI!

THE SCORPIONS' WAY.

There may not be any backgrounds, but the detail to the characters is a sight!

FOR THE SEGA GAME GEAR!

Like the Genesis version, the GG version has the characters but no scenery as present. You can see the detail, and it is will be one of the best portable fighting games out!

FOR THE SEGA CD!

The next level is here! Time to take CD fighting to new paths with glorified sound and lots of digitalization glare. Don't expect this one to be out sometime in the near future, though!

Under the orders of Prince Hanso Davion, a mercenary force known as the Dark Wing Lance must be destroyed. They have killed many innocent people, including your own family. It's up to you to take vengeance on these criminals. It won't be easy, for they have powerful mech units. After ten years of saving up money, you finally have enough to buy a mech, and weapons. Fight in ferocious battles to the death in a unique first-person perspective.

This game creates the feeling of a battlefield where death can come at any time. The sounds are realistic from the roaring cannons, to the dull hum of a laser. You have the ability

to modify your mech until it is the deadliest one around.

Begin your mission in the heart of the city. In the mech shop equip your mech with the necessary weapons to survive the first mission. In the GHQ, you can choose your assignments, and maybe even bargain for more money. Go to the tavern and talk to weird and interesting space veterans. They have plenty of valuable advice and information. You also have a multitude of controls to master. In a short time, any mech pilot can be an expert in ground combat! The whole experience is overwhelming.

 Just like the cartoon, this game will make you laugh.

ARF! ARF!

The trend of cartoons being developed for video game systems has become popular in recent years and this latest entry by T.H.Q. joins many hits such as T.M.N.T. and Mickey Mouse.

Family Dog is about - well - a family dog who must put up with the everyday abuse from Billy, the son in the family. Billy hides in his house trying to get the poor dog with his slingshot, popgun, and a vacuum cleaner. As the troubles are placed on the dog, the family sends him to a kennel where vicious German Shepherds are waiting to "pal around" with him.

BONUS LEVELS

In the living room, the dog must fetch the ball Billy throws before it topples his sister's blocks. Other bonus levels require you to get plates in the kitchen and a boomerang in the yard.

MORE PERILS AWAIT!

Besides having to put up with Billy and the rest of the family, you must also escape from the kennel and flee from forest enemies.

ELECTRIFYING

SUPERCHARGED GAMES

The smash arcade hit has been given a few new darts. Lead-footed criminals will grind your gears, not only on the highway, but the jungles and snow-choked mountains as well.

You'll need to unleash your total fists on some bad dudes and crazy creatures. Power-in and get to work because this job will take a real super hero!

This head bangin' hard chokin' tree-for-all will rattle your bones and send you flyin' into the next county. So, lace 'em up and CHECK it out!

There's bone crushing action for Sega Genesis too. Unless you want some free dental work you had better stick in the mouthpiece, strap on the pads and CHECK it out!

FATAL FURY

The battle of fate has begun...

Fatal Fury is here, and only Takara brings home all the power of the smash can-op arcade megahit. Experience heart-pounding Streetfighting action for the Super Nintendo Entertainment System. Battle against cruel and vicious enemies to be crowned King of Fighters!

Making fast animation and realistic moves make this game the one to beat! Use all your fighting skills, for each villain is huge and dangerous. Choose from among three fighting arenas — each with its own feel to defeat all fiercer but fiercer — your enemies possess hidden powers that defy the force of Nature itself. Witness their terrible might as they transform themselves, hurling energy blasts, leaping into human form! And even as you pound them one by one, waiting and watching is the Big Boss himself — the strongest and meanest foe of all!

The battle is joined on a journey through the mean streets of Southtown. Fight hard as dry turns to night on the beach, or as swirling rain clouds your sight at the Chinese Temple. Superb animation and horizontal scrolling reveal new areas of the challenge, as attack after attack is met and mastered.

Realistic characters, multiple action moves, special skills, all this combined with lightning speed to create the perfect fighting action game. Take on the computer or another player head-to-head. Can you handle the challenge of Fatal Fury and become the King of Fighters?

Electronic Arts, we have a golden opportunity with our own "version" of football in **Mutant League Football!** Instead of playing by the rules, we've simplified things and eliminated almost all of them! Our League is tough, too: You can select from 19 teams and can play in 19 stadiums! Not enough for you? Well, if we don't like the call of a play, we can kill the referee and only be penalized five yards! Still not enough? Add some land mines and flaming pits! Now you've got our version of how football should be played! You can play against the computer's team or play head-to-head against a friend (or enemy). Your coach will also "suggest" what plays are best suited to particular situations.

FIELDS & HAZARDS:

DIRT RACK MINE

The teams can play on over 19 fields, each having certain characteristics and hazards! Primary obstacles include exploding mines, pits and rocks. Mines will blow up a player, and if he is holding the ball, it could result in a fumble. If a player lands in a pit, the play ends. One helpful hint: Rocks can be easily jumped over!

SOME OTHER "PLAYS."

Five yard penalty on TURBO TECHIES for MURDER!

Hey, Ref., bad call! That is all you could do in the Major and Minor Leagues, but in the Instant League, you can actually get rid of the referee! To execute this play press button A when lining up. Then press button C twice and your team gangs up on the referee! However, you can only use this play once.

Boy London Watch, (\$50.00 each in value)

Just how good of a player are you anyway? You may think you're great, but can you win the title of "Most Excellent Dueler" or "Dueler II"? Here's your chance to achieve greatness in five wacky events, plus win some ultra cool prizes to boot. So buy California Games II for your Super Nintendo, start practicing, and match your skills against the world. See scoreboard, above, for entry deadline dates. Watch the scoreboard for future details in EGM and Game Pro magazines.

Rules

- Each event will be played and scored separately. When you think you have a top score to beat, take a photo of your score with you in the picture and send it to DMC Inc. "Ultimate Challenge", 370 Convention Way, Suite 202, Redwood City, CA 94063. Include your name, address and phone number with your entry. Entry must be received by DMC on or before entry deadline date.
- If your score stands at the end of the event, you'll win the DMC prize for that event. Of course, you can keep playing and send in another score should you like yourself!
- All other prizes will be awarded based on other top scores for each event. In the event of a tie score, our judges will randomly draw a winner with the other person(s) dropping to the next level of prize. The decision of the judges is the arbiter of the ultimate tie! Prizes are not transferable. Prizes listed are subject to availability. DMC Inc. reserves the right to substitute prizes of equal or greater value or none. Taxes are the responsibility of the winner.
- Neither DMC nor the judges will be liable for lost or misdirected mail. Incomplete entries are ineligible. Employees, friends and affiliates of DMC Inc., SPN Inc. and Siron Brothers are not eligible to enter. Not open to Italy residents. This contest is open to residents of the USA and Canada only. The event is subject to all federal, state and local laws and regulations. Void where prohibited.
- Winner names, photos and prize information may be used by DMC Inc. for promotional or advertising purposes without further compensation.

Access Time?

Not when you are dealing with the fastest video game character ever to hit the market. Just when you think the brink has been made by #2, along comes Sonic CD! Now with

CD SONIC

THE HEDGEHOG

500 times more memory than a normal cart, awesome musical scores, and tons of cinemas that are accompanied by real voice! Still in its early version, EGM got the chance to get a sneak peek at this trend-setting CD and it looks hot! Check out below what we have and you will be sweatn'! But just like before, when there is more info, EGM will be there first!

THRILL TO DIFFERENT
LANDSCAPES!

Speed across rocky mountains and seas, ever watchful for enemies!

Shifting landscapes are manipulated perfectly with excellent 3-D effects.

These are a few battlegrounds you must survive! A new look to shooters!

A NEW BREED OF SHOOTERS

Tired of the usual 16-Bit shooters? Then Silpheed, the popular PC

game is for you - and it can be yours - if you own a Sega CD! Sega creates a whole new breed of shooters by combining eye-popping 3-D polygon

graphics with live action footage to give an entirely new effect to the game. Boasting the highest frame rate of any digitized game ever - 20 frames per second, Silpheed takes video gaming to new heights! It is so good that Nintendo's StarFox looks like a crude 8-Bit NES cart when compared to Silpheed. If you think the visuals are spectacular, the sound is also revolutionary: the special sound effects for Silpheed are presented in surround sound to make it as real as possible. All the explosions, laser blasts and quick thrusts have to be heard to be believed! For Sega CD fans, this will be the shooter to get!

ROAD AVENGER

HAZARDS GALORE: You have a gun mounted in the front of your car, but several situations will require something more - like excellent timing and driving skills!

EXCELLENT CINEMAS: Several cinemas are dispersed throughout the game. Each is full animation and loaded with special effects! Here are just a few.

TIME THE AVENGER!

Years in the future, the highways, the countries' arteries in terms of transportation, have now become a source of horror.

Ruthless gangs, armed to the teeth, now control the roads, smashing innocent people and anything they can get their hands or tires on!

One particularly nasty group of criminals, aptly called S.C.U.M. (Secret Criminal Underground Movement) is the biggest and strongest of

the road troublemakers. The solution? A group called S.T.O.P. (Special Task Operations Patrol) has been formed to wipe out the S.C.U.M. organization and make the highways safe for ordi-

nary citizens. But S.T.O.P. is the only way to do it.

Road Avenger is packed with nine adventure-filled levels, which put you behind the wheel of a super-fast inter-

ceptor! You are armed only with driving skills and a gun to shoot away nasties! Among the many technical aspects of

many citizens. But S.T.O.P. is greatly outnumbered, as there is more profit in plunder than defending innocents and upholding the law! However, it

the game are 30 plus minutes of full-motion animation, 360-degree scrolling and a full CD soundtrack with digital stereo sound!

FOLLOW THE ARROWS: Whenever the yellow arrow appears, follow its direction and let the rest of the game unfold! Be ready for anything in the turns!

AT THE BRIDGE: A nice drive across a pleasant bridge... until they came! These cycle-freaks will swing axes and chains; get them in your sights and blow away!

Great on-the-field play action makes you feel like you're really in the game!

Pick a man and fade back for the bomb! Keep an eye on those defensive linemen!

Joe Montana's NFL Football

Joe Montana will give you some help as well as inject some color commentary.

SUPER SPECIAL EFFECTS!

Due to the fact that the Sega CD supports scaling and rotation, Joe Montana's NFL Football is a special effects tour-de-force. Here's an example of some very serious scaling effects that this sports game has to offer. These effects are very fluid and add to the realism.

Hut, Hut, Hike!

Talk about your armchair quarterbacks! Hold on to your hats folks, because 1993 will be the year of Joe Montana's NFL Football for the Sega CD!

A sports game like nothing you've ever played before... yeah, that's right! This one is incredible, period.

Multiple views, hundreds of plays and defenses, advanced scaling and rotation effects along with actual sounds and commentaries from Joe himself make this game a real blow-out! Quite simply put, if you own a Sega CD this is a "must have."

Chuck caution to the wind, lock your doors and get ready to play Joe Montana's NFL Football! Joe would be proud!

AFTER THE LIGHT
HAD CEASED...

Darkness swarmed the land. Your father, the valiant knight who conquered the Castle Shadowgate, has been slain. The armies of darkness then conquered the realm. Although you have been imprisoned in their dungeons, it is your destiny to free the enslaved people of your father's land. You must gather your courage and the resources necessary to destroy the evil forces of the night forever, or else.

HORRIFIC DEATH
SCENES

As you search from room to room, different dangers await you.

1. Have your sister give you a match.
2. Ignite the match, and light the hay.

3. Wait for the guard to appear.
4. Kill the guard, and take his keys.

Enter the door on the far left to get your sword. The guard won't need it.

Free the prisoner to get information on how to escape the dungeon confines.

The ghost of your father will consistently help you in your quest to free the land.

This mad man has a hidden secret. Maybe you can persuade him to tell you what he knows.

This guy has been hanging around for much too long. It's too late to save him, though.

Oh, look! A beautiful girl chained to a wall! Is she just a trap to fool the unwary?

The only way to annihilate the second boss is by shooting its tentacles off.

BOSS THREE

The Mining Device of Level Three can be stopped by shooting out its batteries.

If you let go of the button you will store up energy for a huge blast!

SHOOT TO KILL, FIGHT FOR PEACE

You must make way for the Earth colony ships by clearing out any hostile forces. Your ship is an advanced prototype, and it can hold its own on any battlefield. You will traverse a wide variety of alien worlds in search of the final home for mankind.

Four kinds of power-ups, and three levels of each make this game an intense one. This is also one of the few games that you can use your thrust as a weapon. The music rocks to the CD's audio power. The levels get harder and harder, as the screen becomes filled with more and more enemy ships.

The Main Map...

A TIME FOR HEROES!

The princess has been kidnapped by the evil spirits of the castle and it's up to the hero Tonma to get her back! In this vertical and side-scrolling shooter, Tonma can run, jump and shoot various weapons that he acquires on his journey. But be careful, for he can only take one hit, and if he does, it's back to the start of whatever level he met his demise on! At the end of each level it isn't over just yet, there

is a Boss character that must be destroyed to pass! Obviously, these Bosses get more difficult as the game progresses! Also remember some of the villains you encounter can also be vanquished if you jump on top of them, doing this will also give you a higher jump! There are unlimited continues, so if you die far into the game, you do not have to do everything over again! However, you have three lives per game, which can be increased with 1-Ups. Good luck!

1: RUINS

Avoid ghouls and evil sorcerers. Watch for the tongue lashers emerging from the ground! This section scrolls horizontally, so just run and shoot!

BOSS 1: SKELETON

Big and menacing, but slow on the attack! Jump on the ledges on either side of the screen to avoid his deadly sword and raging fireball!

2: CLIFF

Scrolls vertically and horizontally. Press Button 1 to jump; for this option, go down a ledge, push down on the control pad, and press 1.

BOSS 2: DRAGON

When you get to the top of the cliff, a flying dragon will emerge from the tree. Try to stay behind it and shoot for the head! When it stops it will fire at you!

3: WOODS

Another side-scroller, this level starts in the woods then moves into a cave. Watch for villains in the trees and tongue lashers on the ground!

BOSS 3: KILLER TREE

This Boss is all mouth! Keep firing and jumping to hit his mouth. Also watch for the deadly leaves that drop from the branches above you!

THE OTHER LEVELS AT A GLANCE...

4. Statue: Like level 2, there are two bosses at the end and they both throw boulders!

5. Dungeon: Several keys to be found here. The boss throws small stones at you!

6. Castle: Jump to the top and fight guardians to the left and right. Both shoot fire!

ACCOLADE
GAMES WITH PERSONALITY

Believe it or not,

*An interview with
Scott Bayless, CD developer at Sega.*

the brains behind Sega CD™

What are the technical advantages of Sega CD?

Basically it offers massive storage, which means we can now use real video action. A 16-bit cartridge could only hold a few seconds of motion video. But the CD holds over 500 megabytes, so you can now play for hours, interacting with real video.

don't wear pocket-

So the games will be more realistic?

Yeah, way more realistic. We have a second processor and a special graphics chip, so our zooming, scaling, and rotation is incredible. And we use a lot of real-life video you can actually interact with. Characters will speak to you and harass you.

protectors or glasses

What do you mean "interact"?

For example, there's a game called "Night Trap;" that uses all real-life footage with real actors, and you control the action. You have to rescue girls from a house full of ghouls by operating a surveillance system, and trapping them in different rooms. It's like controlling the plot and the action of a real movie, from start to finish. It's pretty wild.

held together with tape.

Do you have a personal favorite CD game?

Yeah. I like the INXS music video game, where you can re-edit their videos with different special effects and graphics. The sound on all the CD's is pretty amazing. It's just as good as an audio component. Plus we're using a lot of original music. When you hook it up to your sound system, it's like playing in a whole new realm. It's really amazing. You forget where you are.

(Those guys work for our competitors.)

TINY TOON

A new amusement park has opened up in Acme Acres. Buster Bunny and the whole Tiny Toons gang are invited to a special grand opening. Unknown to them, however, the park is a trap set by their arch-enemy Montana Max!

The object of Tiny Toons Adventures 2: Trouble in Wackyland is simple: make it through all of the park's assorted rides and you'll receive enough tickets to enter the castle. Every ride pits a different Tiny Toons character against various enemies on strange and exciting rides.

Konami has done a great job with almost every aspect of this cart. Graphics (including some great character animation), game play and sound are all first rate, especially for an 8-Bit cart! There's even a fair amount of technique involved in some of the levels!

If you've been looking for an impressive addition to your 8-Bit NES, try Tiny Toon Adventures 2: Trouble in Wackyland by Konami. Hop to it!

The Log Ride

WACKYLAND AMUSEMENT PARK

Check out all of the fun rides at Wackyland! Try to finish each one to get into the castle!

- (1) **THE BUMPER CARS**- Try to knock the bad guys into the holes in the floor. Collect the "Power" icon for additional impact strength.
- (2) **THE ROLLER COASTER**- Use the "B" button to swing Babs underneath the roller coaster in order to dodge the various obstacles. Use the "A" button to jump.
- (3) **THE TICKET BOOTH**- Convert points into tickets for more rides!
- (4) **THE CASTLE**- This is where your secret admirer awaits.
- (5) **THE TRAIN RIDE**- Try to make it to the front of the train while avoiding enemies.
- (6) **THE LOG RIDE**- Keep Furbell dry! Watch out for surprise attacks by enemies.

To get into the castle, you must have either fifty regular or four gold tickets.

Try to find your way through the maze by using the many doors.

Brave the Many Rides of Wackyland!

Bumper Cars- Use any means necessary to knock the other cars into the hole in the floor. Hold button "A" to charge up your speed. A power meter will tell you how much speed you have. Pick up the "power" icon to increase your strength.

The Roller Coaster- Babs must try to get to the end of this strange roller coaster in order to complete the level. Use button "B" to flip her underneath the car. This comes in very handy in tight spots. Also, be alert for the various enemies.

The Log Ride- Furbell must try to stay on the log throughout the waterlogged caves. After the caves, he must ride a trolley which you control with the joystick. Pay close attention when jumping over obstacles because timing is very crucial!

The Train Ride- Hamton must get to the front of the train where he will fight Arnold the Pig But! Use button "B" to attack the various enemies like Roderick Rat. Make sure that you duck when going under the low ceilings inside the tunnel. Good Luck!

BATTLE DRAGONS!

You got your Battletoads in my Double Dragon! Ridiculous, you've got your Double Dragons in my Battletoads! Regardless, some buddies of the Toads and the Double Dragon duo have been kidnapped! What to do? Go after them and use all the fighting skills they can muster!

The game is a dream come true for fans of Battletoads and Double Dragon! You can play either one or two players, in any combination (one Double Dragon, one Battletoad, two Battletoads, two Double Dragons, etc.) Be careful, though, the rules of Battletoad-dom still apply: in two player mode, you can still beat each other senseless, deliberately or accidentally! As the Toads, you can be Rash, Zitz, or Pimple (he isn't being rescued so the time he is in on the fighting action). On the other hand, the Dragon selection is either Jimmy or Billy. All the moves are the same the Toads have their trademark Super Boot, Super Punch and Ram-Butt. The Dragons have their Dragon Punch and Elbow Slam! Double up for some intense fighting fun!

LEVEL 1-1:

FRIENDS ON THE WING:

The first level is on the wing of a spaceship! You can walk along the wing or crawl on the side! Beware, though: if you crawl, guardians will stop on your hands and you'll fall off! As always, if you play with a buddy, don't hit each other!

Sony Debuts MiniDisc

In an effort to be the company that replaces the cassette as the recording format of choice in the future, Sony Corp. recently unveiled the first MiniDisc player.

Although the MiniDisc is only about 2.75" in size, it provides up to 74 minutes of music (the same capacity as a CD). And because the data is read at a rate that's five times faster than is needed for playback, the data continues to flow from a built-in memory if the laser

Expect cassette to go the way of the 8-track and LPs.

Tooning Into Disneyland's Latest Attraction

Mickey's Toontown, home to Mickey Mouse and his animated friends, since the 1930's, opened its doors to non-Toons on January 26.

According to Disneyland legend, Mickey's Toontown has always existed as an exclusive hideaway for Disney stars. Walt Disney was one of the few non-Toons to have ever set foot inside Toontown. But officials recently decided to open the place up to non-toon guests.

"The original idea for

Mickey's Toontown was for our guests to meet Mickey, in his home and in his neighborhood," said Walt Disney Imagineering Show Producer Dave Burdick. "We didn't want to make it just a set, but a living, breathing, three-dimensional cartoon environment. Everything is exaggerated in Toontown to convey cartoonish elements. For example, there are no straight lines or conventional architecture here."

Once inside Toontown, guests are able to interact with everything from talking marshmallows and rubber tire hydrants to dancing dishes and spinning flowers. Mickey Mouse

fans can wander into Mickey's red shingled cartoon house, stroll in his backyard, and even tour his movie barn, which is filled to the rafters with props from his greatest cartoons. Guests can usually find Mickey on the set of one of his favorite cartoons including Steamboat Willie and The Sorcerer's Apprentice.

Across the street is Gooey's Bounce House. (By the way, has anyone figured out yet if Mickey is a Mouse, and Pluto is a dog, then what's Gooey?) The inflatable abode lets guests actually bounce off its walls, floors, furniture, and even the fireplace.

From the crooked architecture to the day to day toony happenings of a place inhabited by Toons, Disneyland's Toontown is a place worth visiting.

For you pyromaniacs out there, the Fireworks Factory is a notable landmark in Toontown. Its top floor seems to have been blown up already, but what's that detonator button for?

And it's careless Toon hasn't dropped a safe on your head by now, check out Chip 'n Dale's home nested high in the branches of an acorn tree.

Imagineer Jan Foster puts the finishing touch on a model depicting Gadgad's Go-Coaster and Donald Duck's wacky boat, the Miles Davy.

MOVIES

Mario's Making Movies

Remember Mario before he was world famous? In the good old days, Mario and his brother Luigi were merely content with their humble jobs as construction workers.

But then that big ape came along and changed everything. After the arcade game Donkey Kong, Mario's life was never the same.

After an unprecedented string of success as the star of a continuing series of

Do you think it takes this Goomba, who appears in the upcoming movie, a long time to get?

ultra-popular home and arcade games, Mario is now making the jump to the Silver Screen.

Inspired by Nintendo's popular video game character, Super Mario Bros. stars Bob Hoskins and John Leguizamo as the world's best-loved plumbers.

The always interesting Dennis Hopper appears in the movie, along with Fisher Stevens, Samantha Maitlis, Fiona Shaw, Richard Edson, Dana Kaminski and Mop Nixon.

Super Mario Bros. is slated for a summer, 1993 debut.

So you think Mario had it tough in the video game world? That's you, too, here in the cinematic world.

COMICS

Sonic's Comic

We've seen comic book heroes make the jump to video games, but now Sega's own Sonic the Hedgehog will buck that trend by starting in his own comic series set to debut in late April from Archie Comic Publications.

TELEVISION

After a rocky start, X-Men, the animated series, finally returned to its Saturday morning spot on the Fox network in mid-January. Despite major delays, the show has posted some impressive ratings numbers in its first few episodes.

Based on the success of another of Fox's animated series, Batman, Fox is considering two new Fox/DC cartoon projects: a Catwoman and Robin animated series.

Meanwhile, Disney is rumored to be putting the finishing touches on an Aladdin animated series - although Robin Williams believed Genie character will not be involved in the TV adaptation.

Finally, Nickelodeon appears to be back on track with the Ren & Stimpy show, possibly a total of 13 new episodes before a summer. Hey, is it us, or has the brass at Nickelodeon performed some sort of lobotomy on the boys?

SIMULATORS

Fly an X-wing Fighter in Your Living Room?

Hughes Training, Inc. recently introduced Mirage, the world's most advanced concept in public entertainment.

Mirage is a multi-seat capsule based on advanced attraction and visual technology previously used for flight simulation.

Today this low-cost technology has been harnessed to develop an attraction that enables players to travel through and interact with a simulated world - a la virtual

reality.

LucasArts has worked with Hughes to co-develop the Mirage system and originate its creative concepts, including current games with multiple endings.

"When players enter Mirage

they can count on their experience to take a different twist each time due to their own actions and those of their human companions," said Ken McNamara, vice president and general manager for Hughes Training's

Commercial/Industrial division.

In one of the current games, the player assumes the role of an X-wing fighter pilot who must negotiate a treacherous canyon stocked with Empire gun emplacements and TIE fighters and interceptors.

Scenes are created by a state-of-the-art, anti-aliased image generator. The interactive, real-time system supports networking, data base management, animations, and environmental effects.

Wetworks!

Following in the footsteps of great talents in other forms of art, Willicz Portacio was interested in comic book drawing as a child. Today Portacio is one of the hottest artists in the booming comic book industry as his highly anticipated *Wetworks* title nears release in mid-May under the Image banner.

While growing up, Portacio admired Jack Kirby (who regularly worked with Stan Lee) in the pages of the *Fantastic Four* and Neal Adams, who worked on, among other titles, the *Green Lantern* and *Batman*. "What made those artists stand out," Portacio said, "was their realistic rendering and shading of characters - I liked that."

As Portacio's skills increased, he soon found himself working at comic giant Marvel. It was at Marvel, while working on *The Punisher*, *Uncanny X-Men*, and *X-Factor* titles, that Portacio's career really took off.

Readers snapped up copies of the Portacio-drawn titles. They couldn't get enough of the attention to detail and dramatic effects that characterized Portacio's work.

Meanwhile, as Portacio's artistic vision continued to expand, he felt more and more cramped by the limitations put on him by Marvel. Finding solidarity with some of his fellow artists at Marvel, Portacio joined the group that broke off and formed Image Comics last year.

Freed of his creative shackles, Portacio and co-creator Brandon Choi developed *Wetworks* - a military team of highly specialized soldiers that evolves into a superhuman fighting force by way of a mysterious accident (see illustration).

"My philosophy in drawing for comic books is that out of necessity, you have super heroes in fantastic situations - that's what readers expect. I am, for blurring the line between fantasy and reality by using factual bits that lead into fantasy," Portacio explains.

The heavy artillery team, for example, uses a modified version of the U.S. military's plasma-type machine gun. Combining a cyber-punk style

The *Wetworks* team starts out as a highly trained human strike force, but after a terrible accident, they emerge as "The Golden Warriors." Follow their adventures in Willicz Portacio's and Brandon Choi's eagerly awaited *Wetworks* miniseries, set to debut this spring from Image Comics.

Full Steam Ahead

with technically accurate drawing, Portacio gives the reader a believable lead into a fantastic world.

The mini series, which comes out first, will explain the origin and basic elements of the team - including their special liquid metal suits that transform them into "The Golden Warriors."

When the regular series kicks in upon completion of the mini series, Portacio and Choi will explore the unique problems the Webworks team encounters during their evolution from ordinary mortals into superheros.

Their armor, an essential element in their transformation, provides some intriguing storylines. "A symbiotic relationship is forged between the armor and its host. The armor cannot survive without its human host, and therefore provides impenetrable protection. It even recognizes the tendencies of its host, and adjusts accordingly."

Portacio explains:

"In one episode, for example, the muscle guy in the group, Dozer, wants to be even more massive. Like some super-steroid, the armor identifies his motive and he grows even bigger. But will Dozer's external frame get too big for his internal skeleton? Or will the suit somehow build up the calcium in his bones to support the increased mass?"

Besides intricate plots, Portacio's artwork contributes in unique ways to the story he's telling. "Since we don't have sound in comics, I try to manipulate panels and borders on a page to convey different effects," he said. (Note the way Portacio expresses the violent explosion in the illustration.)

Combining art of the highest caliber with in-depth story telling, Webworks is destined to be a formidable bunch among superhero teams. In fact, Portacio hinted that eventually, Webworks will square off with one of Image's other super forces. But will it be Youngblood, Cyberforce, or Web.C.A.T.s?

Rules - All scores on Death Valley Rally must be received by April 15, 1993. If maximum scores are reached, a drawing of all maximum scores will be conducted to determine prize winners. All scores must be submitted with a legit photo. Void where prohibited. Send SAOR to High Scores, 1922 Highland Ave., Suite 220, Lombard, IL 60148 for an official entry form. One winner per tournament per year. Score rollovers will be treated the same as maximum scores. Decisions of the judges will be final.

GAME OVER

SONIC

THE HEDGEHOG

CHAOS EMERALDS

Remember to collect all seven Chaos Emeralds! If all seven are obtained, Sonic can transform into Super Sonic! In this state, Sonic cannot be harmed (except he can be crushed), can do super duper jumps and runs - as long as he can keep getting rings! However, he can change into Super Sonic only when he has 50 rings!

THE MANY FACES OF ROBOTNIK:

REGULAR SONIC...

SUPER SONIC...

...AND TAILS!

LAST BATTLE

The big robot is the first Robotnik creation! But first, you must beat Mecha-Sonic (insert)! MS can be defeated by jumping on its head; Robotnik can be defeated by jumping on his chest when it lands or when its arms are retracted! But watch for Robotnik's shooting arms and flying mines! Is Sonic up 2 it?

HOLLI WOULD IF SHE COULD.

COOL WORLD™

Cool World is an outrageous world where cartoon characters called Doodles are alive. In this bizarre adventure, the Doodles are disturbing the balance between Cool World and Real World. If the balance isn't restored quickly, both worlds will be destroyed! Put your wits against Doodles like Holli Would, Vegas Vamper and Slash. They're out to get you—it's up to you to stop them and save the world!

*Our goal is to try and preserve classic videogame magazines
from years gone by before they are lost forever.*

*Thanks goes out to all the people who make this possible.
From the original editors and writers,
to everyone involved in acquiring and digitizing these magazines.*

*People interested in helping us out, in whatever way possible.
Either by donating classic magazines, scanning, editing or distributing them,
visit us at <http://www.retromags.com>*

*We are only interested in preserving classic magazines
that are at least 5 years out of print.*

*We have no desire or intention to profit from these in any way.
So please, if you come across people trying to sell these releases, don't support them!*

Thank You and ENJOY!
